ANNOUNCING CLVH'S 2018-2019 FALL & WINTER SEMINARS

Wednesday, October 17, 2018 - 7-9 p.m.

Equine Lameness Cases

Presenter: Kathy Ott, DVM

Cost: FREE, but please RSVP

Try your hand at evaluating lameness cases in person and learn how they are worked up and treated! Arthritis? Tendon injury? Chronic performance issues? Dr. Ott is one of the premier equine lameness vets in Minnesota. She will go over lameness exams, imaging, and answer all your questions about treatment!

Wednesday, November 14, 2018- 7-9 p.m.

Barn Safety

Presenter: Jennifer Selvig, DVM & CLVH Staff

Cost: FREE, but please RSVP

This popular interactive seminar will test your knowledge of common safety problems in barn environments and while handling horses! Our vets and techs see all different styles of horse management - come see us share what we've learned to keep you and your equine friends safe and injury-free!

Wednesday, December 12, 2018 - 7-9 p.m.

Colic & Emergency Care

Presenter: Renee Jaklitsch, DVM

Cost: FREE, but please RSVP

Colic is one of the scariest conditions a horse owner can face. With so many causes, how do we treat it and figure out what caused it? What should a horse owner do when a horse starts acting colicky? Dr. Renee is a whiz at colic medicine!

Thursday, January 17, 2019 - 7-9 p.m. *NOTE THURSDAY DATE*

Feeding the Overweight Horse

Presenter: Krishona Martinson, Ph.D., University of Minnesota Extension Service

Cost: FREE, but please RSVP

Dr. Martinson is an engaging speaker and loves to educate horse owners about nutrition! In this seminar she will discuss the challenges of feeding overweight horses—balancing their need for frequent forage with lower calorie demands.

Wednesday, February 6, 2019 - 7-9 p.m.

Equine PPID - Cushing's Disease Info for Owners

Presenter: Robert Stenbom, DVM, Boehringer Ingelheim

Cost: FREE, but please RSVP

Dr. Stenbom is a senior equine professional services veterinarian with BI, the pharmaceutical company that makes Prascend, an FDA-approved drug for Cushing's disease. This talk is geared toward horse owners and the diagnosis and management of horses with PPID. PPID is one of our most common findings in older horses—come learn about the latest research and advancements in this equine metabolic disease.
